

PSObject

Code:

```
# Dummy Data
$name = "John Doe"
$age = 29
$gender = "Male"
$desc = "Nameless Person"

# Create an object with the given properties
$newPSObject = New-Object -TypeName PSObject
$newPSObject | Add-Member -MemberType NoteProperty -Name Name -Value $name
$newPSObject | Add-Member -MemberType NoteProperty -Name Age -Value $age
$newPSObject | Add-Member -MemberType NoteProperty -Name Gender -Value $gender
$newPSObject | Add-Member -MemberType NoteProperty -Name Description -Value $desc
```

Result:

```
PS C:\> $newPSObject

Name    Age Gender Description
----  -
John Doe 29 Male  Nameless Person
```
