

Configuring w32time As NTP Client

Step 1: Stop the time service

```
net stop w32time
```

Step 2: Set the manual peer list of external servers

```
w32tm /config /syncfromflags:manual /manualpeerlist:"[server1],0x8 [server2],0x8"
```

Step 3: Set the connection as reliable

```
w32tm /config /reliable:yes
```

Step 4: Start the time service

```
net start w32time
```

Step 5: Test the configuration

```
w32tm /query /configuration
```

or

```
w32tm /query /status
```

or

```
w32tm /query /peers
```
